**Tough on dirt and dust:** with our walk-behind sweepers/vacuum sweepers, you are well-prepared for cleaning processes in the industrial sector. Our sweeper models are ergonomic, easy to operate and get right into the

corners of yards, paths, workshops and halls. Whether manually operated or traction driven, you will definitely find the right option in our Professional range to suit your requirements.

# MAXIMUM PERFORMANCE, MINIMUM EFFORT

Our walk-behind sweepers/vacuum sweepers enable you to clean effortlessly and efficiently.

## DID YOU KNOW ...

... that vacuum sweepers can also pick up larger objects and coarse dirt, such as pebbles, metal shavings, screws and even plastic bottles up to 0.5 litres?

# BETTER THAN ANY BROOM

There are many good reasons to opt for mechanical cleaning methods. Your health being just one of them.

**Swirling dust and slow progress make manual sweeping with a broom a real feat. The larger the area, the greater the physical exertion. And the result is often still not up to scratch. A walk-behind sweeper/vacuum sweeper can do what a broom cannot.**

#### **Cost-effectiveness versus a broom**

Time is money, we all know that. With a walk-behind sweeper/vacuum sweeper, you can achieve up to ten times the area performance of a broom, which saves you valuable working time and keeps costs down. This also applies to the maintenance of our machines. They are robust and built to last.

### **Health and safety**

Our health is our greatest asset. Protect yourself! Manual cleaning with a broom whips up a lot of dust, which enters your airways and settles in your lungs, where it causes long-term damage. The filter systems

with suction that are built into our models significantly minimise this health risk. Another advantage over broom cleaning is our machines are designed to be operated from an upright position. This not only makes cleaning easier but also prevents posture problems.

The numbers don't lie. We have summarised the key facts to show you the economic advantages of our sweepers/vacuum sweepers compared with a broom.\*

## COST-EFFECTIVE USAGE

Cost-effective from

**200 m<sup>2</sup>**

\* Cost-effective range, figures: minimum surface area in m<sup>2</sup> above which using the machine is cost-effective.

## COMPARISON WITH MANUAL SWEEPING

up to  
faster

**10 ×**

Area performance of a vacuum sweeper compared with employee using a broom.

\* The comparison is based on the machine with the best values from the relevant machine class.

The values are based on cleaning with one side brush.

# WHICH ONE IS RIGHT FOR YOU?

## Walk-behind vacuum sweepers

Traction drive for high manoeuvrability and easy, ergonomic handling.  
Ideal for cleaning areas measuring between 600 and 8,000 m<sup>2</sup>.

**KM 85/50 W**

Walk-behind vacuum sweeper supplied with battery and charger as standard for high area performance. With floating sweeper roller and large filter area.

**KM 75/40 W**

Perfect for indoor areas measuring approx. 600 m<sup>2</sup> or more. Highly manoeuvrable vacuum sweeper with infinitely variable sweeping speed. Available as a battery-powered or petrol-engined version.

There are many factors to take into account when choosing the right model for you. We have the right solution for every requirement.

How big is the area to be cleaned? How manoeuvrable does the sweeper need to be? What kind of floor needs to be swept? Do you prefer a manually driven or motorised option? Before purchasing a sweeper/vacuum sweeper, there are many questions that have

to be answered in order to choose the right model for you. With our portfolio of professional machines, we can help you make the right choice for your individual requirements.

#### **Compact sweepers/ vacuum sweepers**

Easy to operate and quickly to hand.  
Ideal for cleaning areas measuring between 200 and 4,000 m<sup>2</sup>.

#### **KM 70/30 C and KM 70/25 C**

Manual sweepers designed for cleaning indoors and outdoors. Electric sweeper roller drive and side brush drive for hassle-free, low-dust sweeping.

#### **KM 70/20 C**

Through manual cleaning with a wheel drive, the flexible and compact manual sweeper delivers optimum cleaning results on different types of floor.

# RUNS VIRTUALLY BY ITSELF

Walk-behind vacuum sweepers have the advantage that they are very labour-saving and ergonomic thanks to their motorised drive.

But minimising effort is not their only plus point. A large area performance of up to 8,000 square metres, virtually dust-free work thanks to a flat pleated filter, extremely user-friendly operation and excellent cleaning

results even in unfavourable floor conditions – these are just some of the other reasons to opt for a walk-behind vacuum sweeper. Not to mention how easy they are to maintain.

# OUR FLAGSHIP MACHINE

## KM 85/50 W

The most powerful model is suitable for areas up to 8,000 m<sup>2</sup> in size.

The walk-behind vacuum sweeper KM 85/50 W impresses with high area performances. The battery-powered model has the added convenience of a traction drive: sweeping doesn't get much easier than this.

#### 1. Flat pleated filter system

- Large flat pleated filter with 2.3 m<sup>2</sup> filter area
- Excellent cleaning thanks to dual scraper
- Fast filter access

#### 2. Intuitive operation via push handle

- Forward and reverse traction drive via the push handle
- Simple and user-friendly operation

#### 3. Robust machine housing

- Sturdy, double-walled plastic frame
- Retractable side brush protects against damage

#### 4. Floating main sweeper roller

- Excellent dirt pick-up even when the floor is uneven
- No wear adjustment necessary
- Efficient and fast cleaning

#### 5. Simple servicing and detachable hood

- Easy access to the inside of the machine
- Robust and reliable for the toughest applications
- No tools required to change sweeper roller, side brush or filter

# CLASSIC ALL-ROUNDER

Large waste container  
with telescopic handle  
and 40-litre capacity

## KM 75/40 W

The flexible all-rounder is designed for cleaning areas from around 600 m<sup>2</sup>.

Available as a battery-powered or petrol-engined version, the KM 75/40 W walk-behind vacuum sweeper is ideal for quick and thorough cleaning of outdoor areas such as car parks or school playgrounds.

#### 1. Flat pleated filter system

- Large flat pleated filter with 1.8 m<sup>2</sup> filter area
- Easy filter replacement from the clean side
- Filter wiper for effective filter cleaning

#### 2. Service and maintenance

- Easy machine access on both battery and petrol versions
- Hinged service hood

#### 3. Waste container with telescopic handle

- Telescopic handle and rollers for simple handling and emptying of waste container
- 40 l waste container capacity

#### 4. Fixed sweeper roller

- Contact pressure can be adjusted to suit ground conditions
- Wear adjustment can be made via lever operation
- Tool-free sweeper roller replacement

#### 5. Cleaning hard floors and carpeted surfaces

- Diverse application options
- Optional cleaning kit available for carpet and artificial turf

# AGILE AND VERSATILE

Perfect if you want to be efficient and save space: compact sweepers/vacuum sweepers are even effective for sweeping in tight spaces.

The easy-to-transport folding design of the compact sweepers/vacuum sweepers makes them a truly portable option – so you can easily use them in several loca-

tions. Plus, with the height-adjustable push handles, excellent ergonomics are guaranteed. And the intuitive operation makes them quick and easy to use.

# TWO FOR SPECIAL TASKS

## KM 70/30 C AND KM 70/25 C

Both models can be used most effectively on areas measuring between 300 and 4,000 m<sup>2</sup>.

The KM 70/30 C and KM 70/25 C are manual sweepers designed for indoor and outdoor cleaning. The flat pleated filter and electrically driven sweeper roller and side brushes ensure sweeping is low-dust and low-hassle.

#### 1. 36 V Li-ion Kärcher Battery Power+ battery

- Exchangeable Li-ion battery
- Up to 3 hrs battery runtime, depending on the model
- Display showing remaining battery runtime

#### 2. Storage area

- Storage area with fastening options
- Can be used to transport additional cleaning equipment

#### 3. Gripper with mount (optional accessory)

- Simple handling and emptying of waste container

#### 4. Sweeper roller adjustment

- Simple configuration and wear adjustment for sweeper roller
- Parking position to lift the sweeper roller off the floor

#### 5. Adjustable push handle

- Can be adjusted over three positions for ergonomic working conditions
- Space-saving parking position

#### 6. KM 70/25 C with foam filter

- Passive filtration without suction
- For outdoor applications

#### 7. KM 70/30 C with flat pleated filter

- Active filtration with suction
- For indoor and outdoor applications with high concentrations of fine dust

# SMALL SIZE, BIG IMPACT

## KM 70/20 C

Our entry-level model makes light work of areas between 200 and 2,000 m<sup>2</sup>.

Whether it is for spot cleaning or longer working intervals, the extremely manoeuvrable KM 70/20 C sweeper cleans the smallest corners with its sweeper roller and side brushes, which are operated by wheel drive.

#### 1. Adjustable push handle

- Can be adjusted over three positions for ergonomic working conditions
- Space-saving parking position thanks to folding design

#### 2. Filter system

- Integrated filter system with replaceable foam filter cartridges
- Reduced dust impact when sweeping

#### 3. Lifting and replacing the side brushes

- Side brushes can be lifted to reduce dust generation
- No tools required to replace the side brush

#### 4. Sweeper roller adjustment

- Contact pressure of each sweeper roller can be adjusted individually
- Simple configuration and wear adjustment for sweeper roller

#### 5. Large waste container

- Simple handling and emptying of waste container
- Corrosion-resistant plastic container

# SUSTAINABILITY MAKES THE DIFFERENCE

## At Kärcher, sustainability is an aspiration and driving force.

This is why we not only impress with our powerful cleaning systems but also take responsibility: for the environment, our products, the supply chain, society and our staff.

### ZERO EMISSIONS

#### Setting the course for climate protection

As a leading, climate-friendly company in our industry, we have been using green electricity for production in all our factories worldwide since 2021. To reduce our carbon footprint, we save energy and invest in efficient systems and buildings. Because for Kärcher, sustainability does not end at the factory gates, we also consider emissions from upstream and downstream activities.

### REDUCE, REUSE, RECYCLE

#### Focus on conserving resources

We design our cleaning systems to be as environmentally friendly as possible, from manufacture and use right through to disposal. The aim: to reduce the use of primary raw material by procuring materials from sustainable sources, increasing the proportion of recycled plastic in products, and manufacturing long-lasting machines. We are also working on sustainable packaging and avoiding plastic waste.

### SOCIAL HERO

#### Responsibility is our compass

In our supply chain, we also value environmentally friendly behaviour, longterm relationships, strict social standards and transparency. We follow clear criteria against which we measure ourselves and our partners. We take social responsibility seriously, which is why we fund organisations and people that campaign for the preservation of nature, culture and society.

You can find further information on the topic of sustainability in our company at [karcher.com/sustain](https://karcher.com/sustain)
